

1        which a budget is presented very often discloses or fails  
2        to disclose the substance of matters contained therein,  
3        and I would hope that as the committee interprets section  
4        8.04 as to the power of the General Assembly to compel  
5        information to be contained within the budget that this  
6        would permit within this word "information" -- would  
7        permit the General Assembly to prescribe that the infor-  
8        mation be listed by program, or if the General Assembly  
9        should decide we should have an accrual budget, that it  
10       would permit the General Assembly the power to require  
11       the governor to present that kind of information in the form  
12       that the General Assembly needs to see ~~it~~ to understand  
13       what it is that the governor is doing in the budget.

14                I don't think that form and budget relate to  
15       the sequence in which you present the data.

16                THE CHAIRMAN: I would anticipate what the legis-  
17       lature would do would be to provide that the information  
18       be furnished and not varied, and that would satisfy you,  
19       is that correct?

20                DELEGATE HANSON: If that is perfectly clear  
21       that is what we mean by the term "information".
